

# Voyager SkyPad<sup>4</sup>

**Introducing the new SkyPad<sup>4</sup>.**  
**With the stunning Superbright™ Plus display.**  
**Ultrafast Intel® i5 processor. And efficient SSD storage.**  
**It's the most amazing SkyPad yet.**

Buying a portable GPS used to mean you had to either spend a lot of money for a dedicated cockpit device, or spend less on a small screen GPS without "real" charts and plates. And, no matter what you bought, you still needed to bring a laptop if you wanted to work when you got to your destination. Like you, we're pilots who don't like to compromise, don't like to carry more than we need to, and don't want to spend more than we have to, especially with how quickly technology is changing.

## Enter the new Voyager SkyPad<sup>4</sup>. It's everything you ever wanted in a portable GPS, with the Dual-Core power to run any applications you want!

### Features:

- New brighter screen that makes everything easier to read even in direct sunlight.
- New state-of-the-art multi-touch-screen makes it easy to use your finger to point. **No knobs, buttons or stylus!**
- Fast, easy to use, and voted most powerful flight planning & GPS moving map software; Voyager4 Flight Software.
- State-of-the-art 3D HITS (Highway In The Sky) display for the ultimate in situational awareness.
- Get both our built-in digital charts plus our exclusive scanned, geo-referenced, seamless VFR & IFR charts, WACs, and TACs.
- Geo-referenced approach plates and airport diagrams for all 50 states
- Automatically downloads weather, TFRs, and fuel prices, all saved from the internet for cockpit reference > 24 hrs later.
- Optional real-time weather in the cockpit with an WxWorx XM receiver
- Over 4 hr. Lithium Ion battery at full brightness or >6 typical.
- New fast Dual-Core CPU and dedicated ATI Radeon video card.
- Custom created Skypad Controller

### Plus, since it's a powerful Windows 7 computer, your investment \$ are in a device that isn't limited to just cockpit use.

- Send and receive email apps like Outlook
- Browse the Web at full speed (built-in Wi-Fi) using your choice of Web browser
- Create and edit documents with Word or Google Docs
- Do customer presentations with PowerPoint. Even connect a projector or monitor to the built-in VGA connector
- Run any other Windows application
- Plug devices into the 2 USB ports
- Expand storage or work with your digital camera using the SD/HC card slot
